## Installation Instructions Headlight Guard KTM Lc4 Adventure

### Contains:

- 1 x Headlight guard Polycarbonate
- 1 x Holding bracket right
- 1 x Holding bracket left
- 1 x Spacer 32mm
- 1 x Screw dome head M4 X 12
- 9 x Washer large for M4
- 4 x Screw dome head M4 X 16
- 2 x Screw hex M6 x 35
- 2 x Washer large for M6
- 2 x Spacer 16,6.2,16

### Installation:

Install first the left and right side holding brackets on the headlight cover using two dome head screws M4x16, washers M4 and nylock nuts M4 on each side. The deep dip on the headlight cover is facing up (A) and the edge on the holding brackets (B) are facing down. Photos 1 + 2

Attach the black 32mm spacer in the hole middle of the headlight guard (C) with dome head screw M4x12 and washer.

Tighten all screws but be careful not to overtighten and break the headlight cover.

Remove the screws that are on the sides of the headlight (D).

Set the complete headlight cover unit on the lights, set spacers between fairing and the holding brackets and attach with the two hex screws and washers.

Make sure the middle spacer (C) is resting correctly on the fairing. Photo 2.
