Engine Guard Extension
F650GS/ Dakar

Parts included:

- 1 x engine protection extension BMW F650GS
- 4 x rubberized clips 22mm
- 4 x countersunk screw M6x16
- 4 x nut self-locking M6
- 4 x washer M6

Assembly:

The engine protection is installed with the four rubberized clips, four M6x16 screws, four washers for M6 and four self-locking M6 nuts. Position the engine protection in such a way that the pivot of the centerstand locks with the edge the engine protection. Make certain that the retaining clips are behind the engine protection (see illustrations). It is possible that during installation the protection retaining clips can be put on backwards on the centerstand. Tighten all bolt connections evenly.

After approx. 50 km travel inspect all screws and tighten if necessary.
