Oil Cooler Guard Suzuki V-Strom DL1000

Contains:

1 x Oil Cooler Guard
1 x Edge Protector

Necessary tools:

Phillips screwdriver

Installation:

Loosen the attachment bolt of the original oil cooler cover and pull it to the side. Squeeze the edge protector onto the upper edge of the Touratech oil cooler guard and then press it from the side over the oil cooler between exhaust and oil cooler. Push the upper edge of the oil cooler guard with edge protector under the original mounts. Tighten the oil cooler guard with original screw at the original attachment point to max. 18Nm torque.
