Installation Instructions Oil Filler Cap TORX R1200GS

Contains:

1 x Oil Filler Cap R1200 GS TORX 50

Installation:

Clean the surface around oil filler cap and remove it. Clean the sealing surfaces and threads. The Touratech oil filler cap will be installed like the original and tightened with Torx 50 tool that can be found in the R1200GS tool kit.

NOTE: New R1200GS bikes do not have standard tool kit. It is optional and must be purchased separately. Make sure your tool kit includes Torx 50 tool if you decide to install 044-0214.
