Installation Instruction Engine Guard Extension Plate R1200GS

Contains:

- 1 x Engine Guard Extension Plate
- 3 x Retaining pipe clamp 25mm
- 3 x Screw countersunk head M6x16
- 3 x Nut self-locking M6
- 3 x Washer M6

Installation:

The engine guard extension is attached with the three pipe clamps, three counter sunk screws M6x16, self-locking nuts M6 and washers M6 to the center stand. Make sure to install the clamps correctly as show on photos so that they are not sticking out below the motorcycle. Sliding surface needs to stay smooth. Now tighten all bolt connections evenly and check tightness again after approx. 30 miles.
