Installation Instructinons Windshield Hard Part R1200GS

Included:

- 1 x Right side Windshield Hard
- 1 x Left side Windshield Hard Part
- 2 x O-Ring 6x2

Installation:

Loosen the inside nuts for the windscreen adjustment and remove the adjustment.
Loosen the two front screws that are holding the windshield.

Note the position of the original wind shield support parts and pull them out.

Put the O-rings on the new windshiel hard parts and push them in the windshield supports.

Make sure they are in the same position as the original parts were. Left and right parts are different.

Re-install the removed parts and check that they all are secured tight.
