Installation Instructions Side Stand Extension Plate R120GS

Contains:

1 x Side stand extension plates:

Ground plate

Middle plate

Top plate

4 x Screw counter sunk M5x16

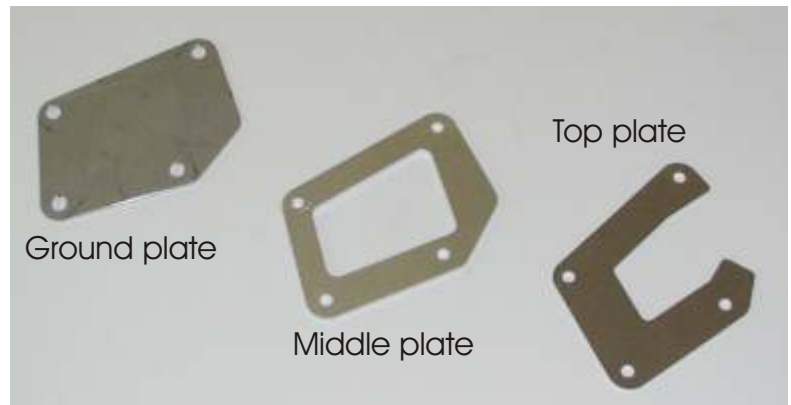

4 x Nzlock nut M5

4 x Washer M5

INSTALLATION:

With the bike on the centerstand, and the sidestand down, position the ground plate with the "45degree corner" towards the inside rear.

Set the middle plate on the ground plate aligned similarly and set then the side stand in the middle of those two plates. Align the top plate and attach all three plates with supplied countersunk screws from the bottom. Place the the washers and nylock nut on the top as shown on photos.

Check the strenght of the spring in regular intervals to make sure side stand stays up.

For Off-Road use it is recommended that the BMW rubber sidestand stop is cut in half to increase ground clearance.
