Aluminum Pannier System
Triumph Tiger 955i

Parts Included:

- 1 x left mount
- 1 x right mount
- 1 x crosspiece upper
- 1 x crosspiece lower
- 2 x spacer triumph tiger
- 4 x screw lens head M8x30
- 2 x screw lens head M8x20
- 4 x screw hex M6x20
- 4 x nut self-locking M8
- 4 x nut self-locking M6
- 8 x washer large for M8
- 2 x washer for M8
- 8 x washer for M6

Assembly:

Dismantle the standard luggage bridge first. The mount is installed (1) with one hex M8x20 screw with a washer M8. Put (2) on with the mounts on the left and right at the inside of the passenger footrest. The footrest will act as a shim to space the mount correctly. Be sure to mount the luggage rack to the inside. Fasten each side with two lens head screws M8x30, four large washers M8 and two self-locking nuts M8. The upper crosspiece is supported from the mounts with the two enclosed spacers and installed with two screws M6x20. Use a total of four M6 washers and two self-locking nuts to the mounts (on the left and on the right). Now the luggage bridge can be re-attached with original bolts. Finally, the lower crosspiece is installed. This is installed with two hex screws M6x20, four washers M6 and two self-locking nuts M6.

There may be clearance problems at the exhaust when assembling on the right side, but it is easily loosened and rotated to finish assembly.
