Aprilia Caponord
Pannier Mounts

Parts included:

- 1 x pannier frame right
- 1 x pannier frame left
- 1 x front crossbar
- 1 x rear upper crossbar
- 1 x rear lower crossbar
- 1 x mounting kit

Attention!!

Connect all bolts loosely first.
Only tighten when all bolts are set.

Mounting:

Remove first the passenger grabrail and the mounts of the passenger footrests. Remove the bolts from the luggage rack. (Photo 1)

Lift the luggage rack carefully and put the flat crossbar between the rack and frame under the rear connector of the luggage rack. (arrow in photo 2)

Bolt the rack back on with the M8x30 caphead screws and washers.

Put the passenger grabrail back into its position, place the spacers in the indentations of the bolts holes, and fasten the front crossbar with the M8x55 caphead screws and washers at the passenger grabrail bolt.

Pannier mounts

Screw the luggage racks on to the right and left with the allen head M6x20 screws. Make sure that the upper support bracket sits outside the front crossbar and under the mounting tabs at the rear upper crossbar. (Photo 4).

The pannier frame mounts to the support arm of the passenger footrest with two M8x25 caphead screws and 4 washers.

(Photo 5)

The lower rear crossbar mounts with the M6x20 bolts and two washers each.

Now tighten all connections.

Use two M8 washers on the original screws of the passenger footrests fixtures and put this on again.
