Radiator Protection F650GS/ Dakar

Parts included:

- 1 x radiator protection left side
- 1 x radiator protection right page
- 2 x spacer for right radiator side
- 2 x allen screw M6x25
- 2 x allen screw M6x16
- 4 x washer large M6

Preparation:

Dismantle the front fairing of the BMW F650GS /DAKAR. Information for this is in the Service and Technology(?) booklet on pages 2-46 and 2-47.

Assembly:

Remove the original plastic radiator guards.

Remove the two rubber grommets from the original plastic guards and install in similar location on the new radiator protection.

On the left side the radiator protection is screwed directly to the frame with the two shorter allen screws (M6x16) and two washers. On the right side, place one spacer each between the radiator protection and the frame. Secure with longer allen screws (M6x25) and (M6) washer.

Re-install the front fairing again in reverse order of the disassembly.
